

Peanut Marketing Summary 2004 Crop

For the States of:

Southeast:

Alabama

Florida

Georgia

South Carolina

Southwest:

Oklahoma

Texas

Mid-Atlantic:

North Carolina

Virginia

Federal-State Market News Service
United States Department of Agriculture
Agricultural Marketing Service
Fruit and Vegetable Programs

PREFACE

This publication is a marketing summary of the 2004 United States peanut crop which is released by the United States Department of Agriculture (U.S.D.A.), Federal-State Market News Service in Thomasville, Georgia.

Shipping point price information was summarized from weekly Peanut Market News reports. Other U.S.D.A. information was obtained from the National Agricultural Statistics Service, the Farm Service Agency, and the Foreign Agricultural Service.

We express our sincere appreciation to the government agencies mentioned above, and also to the members of the industry for their cooperation and time, which made this summary possible.

Additional copies of this summary are available on request from the following address, at the cost of \$20.00 for each additional copy:

THE 2004 PEANUT CROP IN REVIEW

PRODUCTION: According to the United States Department of Agriculture, Agricultural Statistics Board, United States peanut production in 2004 totaled 4.26 billion pounds, up 3 percent from last year's crop. Planted area for the U.S., at 1.43 million acres, was up 6 percent from 2003. Harvested area totaled 1.39 million acres, up 6 percent from 2003. The U.S. yield per harvested acre averaged 3,057 pounds, down 102 pounds from 2003. Record high yields were set in New Mexico, North Carolina, Oklahoma, South Carolina, and Virginia.

Production in the Southeast States (Alabama, Florida, Georgia, and South Carolina) totaled 2.86 billion pounds, up 3 percent from 2003. Area planted in the region totaled 1.00 million acres, up 14 percent from 2003. Harvested acres, at 972,000, were up 13 percent from 2003. The average yield for the Southeast area was 2,946 pounds per acre, 292 pounds below last year.

Production from the Virginia-North Carolina area totaled 461 million pounds, up 11 percent from 2003. Planted acres, at 138,000, were up 2 percent from 2003. Harvested acres, at 137,000, were up 3 percent from 2003. The average yield per harvested acre in the Virginia-North Carolina region, at 3,365 pounds, was up 239 pounds from 2003.

The Southwest peanut crop (New Mexico, Oklahoma, and Texas) totaled 937 million pounds, down 2 percent from 2003. Planted acres, at 292,000, were down 12 percent from 2003. Harvested acres, at 285,000, were down 11 percent from 2003. Yields in the tri-State area averaged 3,289 pounds per acre, 326 pounds above 2003.

PLANTING, GROWING, AND HARVESTING: Planting in the southeastern states began in early May. Planting gained momentum shortly afterwards and by the end of the month was practically complete. At the end of May and into early June, favorable rainfall accumulation was received. Yield prospects in states other than South Carolina were lowered in September due to the affects of heavy rainfall received from hurricanes (Frances, Ivan, and Jeanne). The harvest proceeded slowly in September due to the frequent rainfall. With the return of favorable weather in early October, the harvest reached active levels. Frequent periods of rainfall returned to the area in mid October and slowed the harvest for the duration of the month. Less than fifteen percent of the harvest remained from completion at the beginning of November. The harvest was considered complete by mid-November.

In the Virginia-North Carolina Section, planting was underway towards mid-May. Planting gained momentum shortly afterwards and by early June was practically complete. Favorable weather conditions were received during the majority of the growing season as noted by the record yields received in Virginia and North Carolina. The early harvest was underway in mid-September and by the end of the month was at active levels. Frequent periods of rainfall returned to the area in mid October and slowed the harvest for the duration of the month. The harvest was considered complete by early November.

In the Southwest section, general planting in the major sections of Texas and Oklahoma was considered underway in early May. Planting gained momentum shortly afterwards and by early June was practically complete. The harvest began in the Hi-Plains District of Texas and Oklahoma in late September. The harvest proceeded slowly through mid-October due to frequent periods of rainfall. Producers were actively able to harvest the crop shortly afterwards for a period of about two weeks. Another period of unfavorable weather was received in late October and continued into early November. By mid November, industry sources estimated the harvest to be about three-fourths complete. The remaining one-fourth of the harvest was eventually completed by around early December.

THE 2004 PEANUT CROP IN REVIEW CONTINUED

MARKETING: In the Southeastern section, shipping point sales were transacted as early as December 2003. These preseason contract sales were noted on an irregular basis throughout the remaining months prior to harvest. Opening per pound prices on Runner type for prompt delivery (shipments within thirty days) at or near harvest time averaged 42 1/4 cents on Jumbo, 39 1/2 cents on Medium, 37 cents on No.1, and 38 1/2 cents on U.S. Splits. The highest price levels recorded averaged 42 1/4 cents on Jumbo, 39 1/2 cents on Medium, 37 1/2 cents on No.1, and 39 cents on U.S. Splits. The lowest price levels recorded averaged 35 3/4 cents on Jumbo, 32 cents on medium, 32 1/4 cents on No. 1, and 32 1/2 cents on U.S. Splits.

In the Virginia-Carolina section, shipping point sales were transacted as early as March 2004. These preseason contract sales were noted on an irregular basis throughout the remaining months prior to harvest. Opening per pound prices on Virginia for prompt delivery (shipments within thirty days) at or near harvest time averaged 45 cents for inshell Jumbo, 41 cents for inshell Fancy, 56 cents for shelled Extra Large, 40 1/4 cents for shelled Medium, 38 cents for shelled No. 1 with splits, and 37 3/4 cents for shelled No. 2 with splits. The opening average prices were the highest averaged levels for the season. The lowest price levels recorded averaged 39 cents for inshell Jumbo, 36 cents for inshell Fancy, 53 cents for Extra Large, 37 cents for Medium, 33 3/4 cents for No. 1 with splits, and 33 1/2 cents for No. 2 with splits.

In the Southwestern section, shipping point sales were transacted as early as February 2004. These preseason contract sales were noted on an irregular basis throughout the remaining months prior to harvest.

Opening per pound prices on Spanish type for prompt delivery (shipments within thirty days) at or near harvest time averaged 46 1/2 cents on Jumbo and 42 cents on No.1. The highest price levels recorded averaged 50 cents on Jumbo and 44 cents on No.1. The lowest price levels recorded averaged 42 cents on Jumbo and 39 1/2 cents on No. 1. Runner type prices for prompt delivery showed mostly the same price levels as Southeastern runners.

FOOTNOTES:

- 1/ Excludes stocks on farms. Includes stocks owned by or held for account of CCC in commercial storages. Farmer stock on net weight basis.
- 2/ Includes shelled edible grades, shelled oil stock, and shelled seed (untreated).
- 3/ Actual farmer stock, plus roasting stock, plus shelled peanuts X 1.33.
- 4/ Includes peanuts milled for seed.
- 5/ Includes straight run oil stock peanuts.
- 6/ Cleaned and unshelled.
- 7/ Relates to oil mills only.
- 8/ All crushings regardless of grade.
- 9/ Excludes peanuts milled for seed.
- 10/ Beginning in February 1988, shelled edible grades include blanched and shelled roasted peanuts converted to a raw basis using conversion factors of 1.08 and 1.12 respectively. This should be considered when comparing with previous year.
- 11/ Includes peanut butter made by manufacturers for own use in candy.
- 12/ Formerly Titled "Salted Peanuts". Includes salted, unsalted, dry and honey roasted, salted and unsalted roasted.
- 13/ Includes peanut butter made by manufacturers for own use in cookies and sandwiches, but excludes peanut butter used in candy.
- 14/ Includes all shelled peanuts crushed regardless of grade.
- 15/ Includes peanuts re-packaged, roasted in shell, salted in shell, and raw in shell.
- 16/ Crushings by type not available.

1/ Quality factors for 1995-2004 crops are derived from the total of all certificates received and tabulated. This data has been prepared and summarized by the Kansas City Administrative Office from inspections reported by the Federal-State Inspection Service.

2/ FM, M and LSK are expressed as percentages of the gross weight of the peanuts. SMK, SS, DM, OK, and ELK are expressed as percentages of the total weight excluding FM and LSK.
